EXPERIENCE

Full Stack Developer Intern

Oct 2024 – May 2025

Raymond James

Tampa, Florida

- Architected Angular SPA via SSR caching, cutting Time-to-Interactive from 5s to 3s for 10K daily active users.
- Refined UI responsiveness and accessibility via modular layouts, extending median user session duration by 2min.
- Initiated 230 Jasmine tests, identifying 130 frontend defects and reducing production issues by over half.
- Scaled ASP.NET REST API with Kubernetes orchestration, handling 10k concurrent requests at high availability.
- Refactored Oracle 19c queries using indexing and partitioning, lowering backend latency 1.8s under peak load.
- Orchestrated Jenkins CI/CD with SonarQube quality gates, shortening software development life cycle by 15 days.

Frontend Developer

Apr 2022 – Jul 2023

Infosys

Pune, India

- Delivered 50 high-fidelity React 18 UI from Figma prototypes, elevating user experience and UX compliance by 80%.
- Engineered WCAG 2.1-compliant responsive design, driving mobile traffic 2x via cross-device compatibility.
- Crafted reusable component libraries, removing 1200 redundant LOC and decreasing bundle size below 1MB.
- Integrated REST API with Redux 4.2 state management, slashing average fetch-to-render latency to 680ms.
- Enforced Postman contract testing and Git version control, preventing 45 integration issues across 50 agile sprints.
- Mentored cross functional team 6 engineers through code reviews, doubling team collaboration efficiency.

Software Engineer

Dec 2020 – Mar 2022

Capgemini

Pune, India

- Achieved 99.95% uptime for React enterprise apps via AWS S3 multi-region failover supporting 30K peak users.
- Secured role-based access control and OAuth authentication, blocking 40 unauthorized access attempts quarterly.
- Automated serverless workflows with AWS Lambda and SNS, mitigating event-driven latency to 350ms.
- Deployed Java Spring Boot microservices with design patterns on AWS EC2, facilitating 2s recovery failover.
- Adopted TDD with 300 JUnit unit testing, curbing production regression incidents from 12 to 5.

Software Developer Intern

Jun 2019 – Feb 2020

Polestar

Pune, India

- Developed event listing modules with Bootstrap, delivering p95 form submissions in under 550ms across devices.
- Built responsive role-based admin dashboards, producing 2x growth in web development content delivery rates.
- Established Git workflows with design reviews, minimizing 35% of merge conflicts and release pipeline bottlenecks.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript (ES6), TypeScript, Java

Frameworks: React, React Native, Angular, Bootstrap, Express.js, Next.js, Cypress, Jest, GraphQL,

Platforms: GitHub, Figma, Node.js, Kafka, Postman, JIRA, Microsoft Suite, CMS

Developer Tools: Webpack, Excel, NPM, Visual Studio Code, SQL Server Management Studio

Database: MySQL, MongoDB, PostgreSQL, Oracle, Redis

Cloud Services: AWS (EC2, S3, IAM, ECS, Lambda), Azure Devops, Docker

PROJECTS

AI Content Generator | *Next.js, TailwindCSS, Clerk, Gemini, Stripe, PostgreSQL* | [GitHub](#) Jun 2025 - Jul 2025

- Created a full-stack AI content generator SASS app using Next.js and TypeScript, integrating Gemini for AI, Clerk for authentication, Stripe for payments, Shaden UI for components, and PostgreSQL for robust data management.

Vikram Travels | *React, Material UI, EmailJS* | [Link](#)

May 2022 - Jun 2022

- Formulated a branding-focused React website for Vikram Travels, driving 20% surge in online bookings and 15% uplift in customer retention, while enhancing email services via EmailJS to achieve 30% faster client response rate.

EDUCATION

University of South Florida

Tampa, Florida

Master's Degree, Business Analytics and Information Systems

Aug 2023 - May 2025

Savitribai Phule Pune University

Pune, India

Bachelor's Degree, Information Technology

Aug 2016 - May 2020
