EDUCATION

University of South Florida

Master's Degree, Business Analytics and Information Systems

Tampa, Florida

Aug 2023 - May 2025

Savitribai Phule Pune University

Bachelor's Degree, Information Technology

Pune, India

Aug 2016 - May 2020

EXPERIENCE

Software Development Intern

Nov 2024 - Mar 2025

Raymond James

Tampa, Florida

- Engineered a full-stack financial platform with Angular (frontend), ASP.NET (backend), and Oracle DB, optimizing system efficiency and scalability by 55% through advanced architectural decisions and creative problem-solving.
- Automated CI/CD workflows with Jenkins and SonarQube, applying unit testing and integration testing using JUnit and Cypress to ensure 80% improvement in software development life cycle and code quality analysis.
- Integrated CRUD operations with indexed queries and caching, reducing latency by 60%, and designed RBAC for robust security and access management while performing regular root cause analysis for system bottlenecks.
- Deployed real-time monitoring with Prometheus and Grafana, enabling preemptive alerting, performance visualization, and rapid troubleshooting, which reduced downtime and improved quality assurance by 45%.

Frontend Developer (React)

Apr 2022 - Jul 2023

Infosys

Pune, India

- Architected 50 high-performance user interface using HTML, CSS, JavaScript, React, Figma prototypes, improving client specification adherence by 80% and redefining user experience benchmarks aligned with product features.
- Led web development using REST API, employing Postman for API collaboration, GIT version control, and peer code review slashing data latency by 70% for efficient state management and agile product management.
- Implemented responsive design principles, conducted end-to-end design reviews, enforcing component reusability and WCAG accessibility standards leading to a 55% enhancement in cross-device compatibility.
- Mentored a cross-functional team of 6 UI engineers through tailored training and interactive written and verbal communication skills, fostering a 50% boost in UI development techniques and expertise in web services.

Software Engineer

Dec 2020 - Mar 2022

Capgemini

Pune, India

- Spearheaded React web application development for 50 enterprise users, integrating AWS Amplify and Microsoft Azure services to ensure 100% uptime and seamless user experiences across cloud infrastructure.
- Optimized UI/UX across Java based microservices by resolving 120 defects using design patterns and profiling tools, increasing customer engagement by 60% while ensuring compliance with industry standards.
- Streamlined IAM flows with AWS Cognito and Azure AD, reducing unauthorized access by 40% through meticulous attention to detail while embedding zero-trust architecture and TDD principles.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, ES6, TypeScript, SASS, C, C++, C#, GraphQL, ASP.NET MVC, Vue

Frameworks: React, Angular, Bootstrap, Express.js, Next.js, Tailwind CSS, JSON, Cypress, Jest, Jasmine, Selenium

Platforms: GitHub, Figma, Node.js, Kafka, Postman, Jenkins, JIRA, Microsoft Suite

Developer Tools: Webpack, Excel, NPM, Dbeaver, Visual Studio Code, SQL Server Management Studio

Database: MySQL, MongoDB, PostgreSQL, Oracle, Redis, Elasticsearch, DynamoDB

Cloud Technologies: AWS (EC2, S3, IAM, ECS, Lambda), Azure Devops, Docker

PROJECTS

Home Service App | *Next.js, Hygraph, Descope, GraphQL, TailwindCSS* | [Link](#)

May 2024 - Jun 2024

- Built a Next.js app for home service bookings with Hygraph CMS integration and Descope authentication, streamlining authentication efficiency by 70% and ensuring seamless backend data management.

Vikram Travels | *React, Material UI, EmailJS* | [Link](#)

May 2022 - Jun 2022

- Formulated an agile React website for Vikram Travels, boosting online bookings by 20% and customer satisfaction by 15%, while optimizing email services with EmailJS for a 30% faster response time.
