EDUCATION

University of South Florida — Tampa, Florida
Master's Degree, Business Analytics and Information Systems — *Aug 2023 - May 2025*

Savitribai Phule Pune University — Pune, India
Bachelor's Degree, Information Technology — *Aug 2016 - May 2020*

EXPERIENCE

Full Stack Developer Intern — Oct 2024 – May 2025
Raymond James — *Tampa, Florida*
- Architected Angular SPA via SSR caching, cutting Time-to-Interactive from 5s to 3s for 10K daily active users.
- Scaled ASP.NET REST API with Kubernetes orchestration, handling 10k concurrent requests at high availability.
- Optimized Oracle 19c queries using indexing and partitioning, lowering backend latency 1.8s under peak load.
- Initiated 230 Jasmine tests, uncovering 130 frontend defects and reducing production issues by more than half.
- Implemented Jenkins CI/CD with SonarQube quality gates, shortening software development life cycle by 15 days.

Frontend Developer — Apr 2022 – Jul 2023
Infosys — *Pune, India*
- Delivered 50 high-fidelity React UI from Figma prototypes, elevating user experience and UX compliance by 80%.
- Engineered WCAG-compliant responsive design, driving mobile traffic 2x via cross-device compatibility.
- Built reusable component libraries with React hooks, removing 1200 redundant LOC and shrinking bundle size.
- Integrated REST API with Redux 4.2 state management, slashing average fetch-to-render latency to 680ms.
- Enforced Postman contract testing and Git version control, preventing 45 integration issues across 50 agile sprints.
- Mentored cross-functional team of 6 engineers through code reviews, doubling team collaboration efficiency.

Software Engineer — Dec 2020 – Mar 2022
Capgemini — *Pune, India*
- Achieved 99.95% uptime for React enterprise apps via AWS S3 multi-region failover supporting 30K peak users.
- Engineered React dashboards with Recharts, visualizing JSON-driven analytics in real time for 30K users.
- Deployed Java Spring Boot microservices with design patterns on AWS EC2, facilitating 2s recovery failover.
- Secured OAuth authentication and role-based access control, blocking 40 unauthorized access attempts quarterly.
- Adopted TDD with 300 JUnit/Jest unit testing, curbing production regression incidents from 12 to 5.

Software Developer Intern — Jun 2019 – Feb 2020
Polestar — *Pune, India*
- Developed event listing modules with Bootstrap, delivering p95 form submissions in under 550ms across devices.
- Produced responsive role-based admin dashboards, boosting 2x growth in web development content delivery rates.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript (ES6), TypeScript, Java, D3.js, Recharts
Frameworks: React, React Native, Angular, Bootstrap, Express.js, Next.js, Cypress, Jest, GraphQL
Platforms: GitHub, Figma, Node.js, Kafka, Postman, JIRA, Microsoft Suite, CMS
Developer Tools: Webpack, Excel, NPM, Visual Studio Code, SQL Server Management Studio
Database: MySQL, MongoDB, PostgreSQL, Oracle, Redis
Cloud Services: AWS (EC2, S3, IAM, ECS, Lambda), Azure Devops, Docker

PROJECTS

AI Content Generator | *Next.js, TailwindCSS, Clerk, Gemini, Stripe, PostgreSQL* | [GitHub](#)   Jun 2025 - Jul 2025
- Created a full-stack AI content generator SASS app using Next.js and TypeScript, integrating Gemini for AI, Clerk for authentication, Stripe for payments, Shadcn UI for components, and PostgreSQL for robust data management.

Vikram Travels | *React, Material UI, EmailJS* | [Link](#)   May 2022 - Jun 2022
- Formulated a branding-focused React website for Vikram Travels, achieving 20% surge in online bookings and 15% uplift in customer retention, while enhancing email services via EmailJS to achieve 30% faster client response rate.
