EXPERIENCE

Java Full Stack Developer

Fiserv

Jul 2025 – Present

Coral Springs, Florida

- Modernized Java 21 Spring Boot payment APIs with Redis tuning, shrinking response times 30% for high-volume transactions.
- Pipelined Kafka payment events and Angular ops dashboards, processing 100K daily transactions across merchant workflows.

AI Engineer

Humanitarians AI

Jun 2025 – Jul 2025

Boston, Massachusetts

- Released Next.js LLM dashboards with Chart.js and memoized stores, improving p95 render latency 41% for analytics UI.
- Streamlined n8n workflows via secure webhook queues, syncing 6K AI events in real time while preserving 99.9% uptime.
- Implemented Jest suites and Lighthouse CI audits, raising accessibility to 95% and preventing UI regression defects by 46%.

Full Stack Developer

Raymond James

Oct 2024 – May 2025

Tampa, Florida

- Architected Angular SSR with streaming hydration and CDN caching, driving median FCP to 1.2s across 120K sessions.
- Developed ASP.NET APIs with rate limits and cursor pagination, supporting 10K concurrent financial queries within SLA.
- Hardened platform security using rotating JWT, mTLS, and audit logs, cutting enterprise authentication incidents by 74%.
- Instrumented Prometheus metrics and Web Vitals to baseline UX health, reducing MTTD from 35 min to under 10 min.
- Migrated Jenkins CI/CD to GitHub Actions with SonarQube gates, doubling weekly releases and shrinking MTTR by 40%.

Frontend Developer

Infosys

Apr 2022 – Jul 2023

Pune, India

- Built 40 React microfrontends from Figma prototypes meeting WCAG compliance, elevating sprint release cadence by 67%.
- Integrated Redux Toolkit and Storybook design system, serving 2.5M weekly API calls and removing 35K redundant LOC.
- Executed 300 Cypress and snapshot tests in TDD workflows, lifting code coverage 92% and halving regression reopen counts.
- Mentored 6 engineers on render profiling, accessibility, and CI debugging, increasing code review throughput 74% quarterly.

Software Engineer

Capgemini

Dec 2020 – Mar 2022

Pune, India

- Optimized React dashboards with GraphQL resolvers, sustaining sub-800ms median latency at 2K QPS in multi-region traffic.
- Formulated CQRS and Saga patterns using Redis streams and outbox writes, ensuring atomic state transitions in 15 services.
- Scaled Node.js services on Kubernetes with HPA and PDBs, lifting deployment reliability 32% across 15 production services.
- Deployed microservices on AWS EC2 with ALB routing and CloudWatch SLOs, achieving 99.98% uptime for 1.2M ops daily.

Software Developer

Polestar

Jun 2019 – Nov 2020

Pune, India

- Constructed React dashboards with virtualization and cached contexts, rendering 15 charts under 380ms for 5K analysts.
- Refined JavaScript reconciliation via batched DOM updates, lowering layout thrash 45% and delivering 60 fps interactions.

PROJECTS

AI Vora | [React](#), [TailwindCSS](#), [Clerk](#), [Gemini](#), [PostgreSQL](#), [Node.js](#) | [Link](#)

Oct 2025 – Nov 2025

- Created a full-stack GenAI SaaS platform uniting React frontend, Clerk auth, PostgreSQL database, Gemini LLM, and NodeJS backend, attaining a 99.98% uptime over 25K AI workflow actions.
